# Servicing, maintenance & repairs for the scrap metal & recycling industry

A service, maintenance and installation focused; family owned company

Scraptech is focussed on the servicing, maintenance, installation and repairs of fixed and mobile plant equipment for the Recycling and Scrap Metal industries. Scraptech can assist your company with a scheduled and preventative maintenance program that will maximise your productivity, operating profit and limit machinery downtime.

With over 20 years experience both hands on and operational management in the field, we have an in-depth knowledge of processes used throughout the recycling industry. Including and not limited to:

- **Scrap handlers**
- **Excavators**
- **Shears**
- **Magnets**
- **Gensets**
- **Grapples**
- **Attachments**
- **Mobile plant equipment**
- **Compactors**
- **Static bailers**
- **Mobile bailers**
- **Shear bailers**
- **Blades**
- **Shredders**
- **Pulverises**
- **Briquetting**

## Installations of fixed plant equipment

Installation of fixed plant equipment from layout through to commissioning. Scraptech specialise in planing and costing structures, combined with a scheduled preventative maintenance program that will maximise your operating profit and limit machinery downtime.

## Equipment refurbishing work

With long-term industry experience; Scraptech have developed skill sets that will ensure your processing equipment will continue to operate like the day it was put into commission by assessing and evaluating your refurbishment options.

## Mobile service & in-house

Scraptech service the recycling and scrap metal industries, covering services such as; line boring, repairs, maintenance, machine installation, equipment refurbishment, manufacturing of waste bins, safety rails, machine fit outs, attachment repairs and modifications.

## Machining & Boring services

Scraptech offer machining and line boring services in scenarios where machinery transportation is either not an option; and/or is very costly. Equipped to cover machining and boring requirements, Scraptech can provide these services in-house or on location with our mobile service.

## Preventative Maintenance service

Our preventative maintenance service programs are designed to suit specific customer requirements. Well planned scheduled servicing will assist in preventing costly manufacturing or production downtime due to machinery failure.

## Waste bins manufacturing & supply

Manufacturers and suppliers of waste bins ranging from yard bins through to hook bins. We can custom manufacture a bin to suit your specific requirements in size, dimension and function.
